Stage #2: Treatment Cycle: <input type="text"/> Days	<input type="text"/> Lbs.
Stage #3: Treatment Cycle: <input type="text"/> Days	<input type="text"/> Lbs.
<b>Managing Stage:</b>	
<b>Proposed Copper Usage/Day at end of Treatment Plan:</b> <input type="text"/> <b>Lbs.</b>	
<b>% Reduction in Copper Usage:</b> <input type="text"/> %	

<b>*Calculating the Volume of a Footbath:</b>
To determine the volume of the footbath, multiply the inside length (inches) by the inside width (inches) by the solution height (inches). Divide by 231 (the factor for converting cubic inches to gallons).
<b>(L x W x H) in inches / 231 = Gallons of solution</b>
