
Is it possible to prevent Hairy Hoof Wart **WHILE**
Reducing copper sulfate
AND
Eliminating formaldehyde in footbaths

It is now!

Introducing...

Healthy Hooves™
the Copper Delivery System™

Introducing...

Healthy Hooves™ the Copper Delivery System™

- Helps maintain healthy herds
- Sustains consistent active copper levels in footbaths
- Reduces use of copper sulfate by 50—80%
- Protects the environment

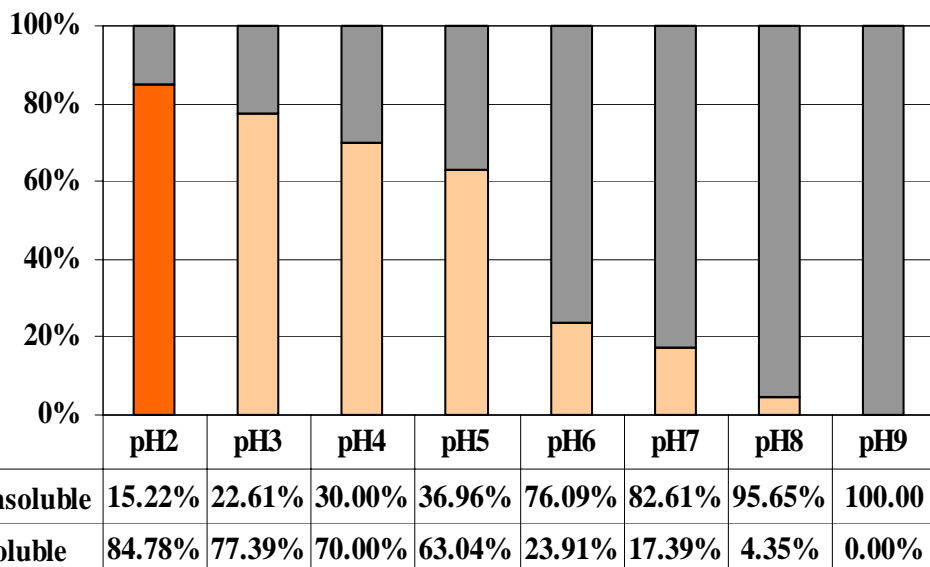

Maintain 85% Copper Solubility with Healthy Hooves™

Healthy Hooves™ — maximizes the available copper used to prevent Hairy Hoof Wart.

Typical usage for a 50-gallon footbath is 1 gallon

Healthy Hooves™ and 5 –10 lbs. of Copper Sulfate.

Healthy Hooves™ is research-driven and farm tested.

As pH increases, solubility of CuSO_4 decreases. **Healthy Hooves™** overcomes this issue. Begin using **Healthy Hoover™** today!

Healthy Hooves™ is protected under a United States Patent.
